VERY IMPORTANT:

In the Summer of 2010 our filter manufacturer relocated outside of the US and discontinued the production of the FF-2003 Fuel Filter. We made the change to an American made manufacturer which forced us to change the size of the fuel filter thread. However, the new thread size offers you a much larger selection of available cross references. If you currently have an FF-2003 or FF-5712, those are the ONLY interchangeable filters you can use with your current nipple. If you have the FWS-3003, Donaldson P553203 or the new silver fuel manifold highlighted to the left, then you have the new updated nipple. If you have the FF-2003 or FF5712 and would like to order the new filter nipple for more cross references ,simply call FASS and order Part# FSN-2001.
